S2 Count:

Use this space to draw any birds
you could not identify.

Return a copy of your checklist to the Montauk Library to receive a Montauk Library Bird Club button, or email it to birdclub@montauklibrary.org. We will collect the data and upload it to eBird, helping scientists worldwide to study bird populations and distributions.

Montauk Library, 871 Montauk Hwy, Montauk, NY

BIRDS OF MONTAUK
CHECKLIST

Name: _____

Session 1 (S1):
Date: _____ Time: _____
Location: _____
Stationary or traveling: _____

Session 2 (S2):
Date: _____ Time: _____
Location: _____
Stationary or traveling: _____

- **Choose your count site:** Find a place in your backyard, on the beach, or on a trail. You can stand still or take a walk and see what species you might encounter.
- **Count all the birds you see at your count site:** For each species, keep track of the maximum number of individuals visible at a time. The goal is to never count the same bird more than once. For any birds you cannot identify, take notes on the back of the page of their size, color, behavior, and what they sound like. Repeat for a second session. Mark the date, time, and location.
- **Report your counts:** Return a copy of your checklist to the library and receive a Montauk Library Bird Club button. Students in grades 7+ can receive 2 hours of community service credits for completing two 15-minute counts. If you require community service hours, please see the children's department.
- The images below are just some of the species you might see. For a full list, ask a librarian for a field guide recommendation.

Backyard Birds

Blue jay
S1 Count:
S2 Count:

Northern cardinal
S1 Count:
S2 Count:

Black-capped chickadee
